

SmartFarm Data Management

Kieran Murphy¹

¹SmartFarm Data Lead, Agriculture Victoria Research

Synopsis	Demonstrated lessons from small, medium and high data Agriculture SmartFarm use cases using edge computing and collaborative data infrastructure and the flow on development of capability for AVR researchers.
Format of demonstration	Live Demonstration and Slide Show
Target research community	Agriculture Research, AgTech, Research Development Corporations
Statement of Research Impact	The initiation of new data infrastructure capability (technical and social) has transformed the ability of Agriculture Victoria Researchers to collect, curate and manage data from increasingly sophisticated SmartFarm sensor technologies.
