

# Monash Secure eResearch Platform project

Mat Ishac<sup>1</sup>

<sup>1</sup>Project Support Officer, Monash University

<b>Synopsis</b>	Presenting the Monash Secure eResearch Platform project - A high powered, safe and secure research platform that allows data owners and researchers to store, access, share, link and analyse data at scale, in a fully governed and highly secure environment whilst maintaining full control of the data at all times.
<b>Format of demonstration</b>	Live Demonstration
<b>Target research community</b>	Research Data Management
<b>Statement of Research Impact</b>	With Monash SeRP, data custodians have complete and full control of the data. There is the ability to define different roles and permission levels to ensure the data is accessed only by approved personnel. This means the data will always remain protected and significantly reduces risk of a data breach.
