

Cultivating a Connected Community

Megan Guidry | NeSI Training Coordinator |
New Zealand Carpentries Regional Coordinator

NeSI Training Goals for 2019... (a sample)

- Run more carpentries workshops in 2019 than 2018 ✓
- Have more Carpentries Instructors checking-out ✓
- Improve data collection process ✓

- Develop the New Zealand (and Australasian) Training Community ?

Consistency

regular opportunities for interaction/ engagement

- One method for increasing connection.
- Increases trust
- Signals that the community is here to stay, and worthy of time and effort

How is NeSI leveraging consistency?

- Running Monthly hacky hours *online*
- Hosting quarterly Carpentries community calls
- Working towards a national calendar of training events happening in NZ (increase visibility)

So far -- some success / some pain points
will this ultimately help researchers be more connected? --
TBD

Consistency is just one tool...

**How do you cultivate or measure connection
in your communities?**
