

RESEARCH SOFTWARE IS RECOGNISED AS A FIRST-CLASS OUTPUT OF RESEARCH.

See Shape Sustain

We will see research software when it is:

- shared, published, or otherwise made available upon creation
- cited or identified in reuse
- captured in data provenance or workflows.

Infrastructure

- Scholix schema modifications
- Measures: Finding software report

Community

 Visible Research Software Interest Group

Guidance

- New materials on website
- Consults/guidance on publishing code and software

Advocacy

- Publisher policy for Code availability
- Software Management Policy Implementation Guide

We will shape research software when its authoring:

- anticipates broadest appropriate use
- employs best practices for quality software
- where possible, extends upon existing software rather than recreating it

Infrastructure

Measures: existence of new research software

Community

RSE Stories profiles and impact stories

Guidance

- Best practices in RSE stories
- New website content

Advocacy

 ECR awards for new software in Statistics, Bioinformatics, Ecology and Astronomy

We sustain research software when it:

- is complemented by roles which are themselves stable, inclusive, supported and valued
- has viable pathways to maintenance.

Infrastructure

Measures: Research Software Capability Report - how big is the workforce that develops and maintains research software for others to use?

Community

- RSE-AUNZ support
- RSE-Asia Australia Unconference

Guidance

New website content

Advocacy

- Eureka Prize for Excellence in Research Software
- Career progression and forums
- DEI for RSEs

And more...

Outputs and Activities

- FAIR principles for Research Software
- 10 FAIR things for curating reproducible and FAIR research
- Research Software Alliance
- Research software Funders Forum
