# UWA's RDM journey

- Timeline
- Broader project
- RDMP tool project
- Progress so far

# Timeline to an integrated RDM tool at UWA

# IRDS&MS project

Implement a comprehensive UWA data management system and process to manage business and research data

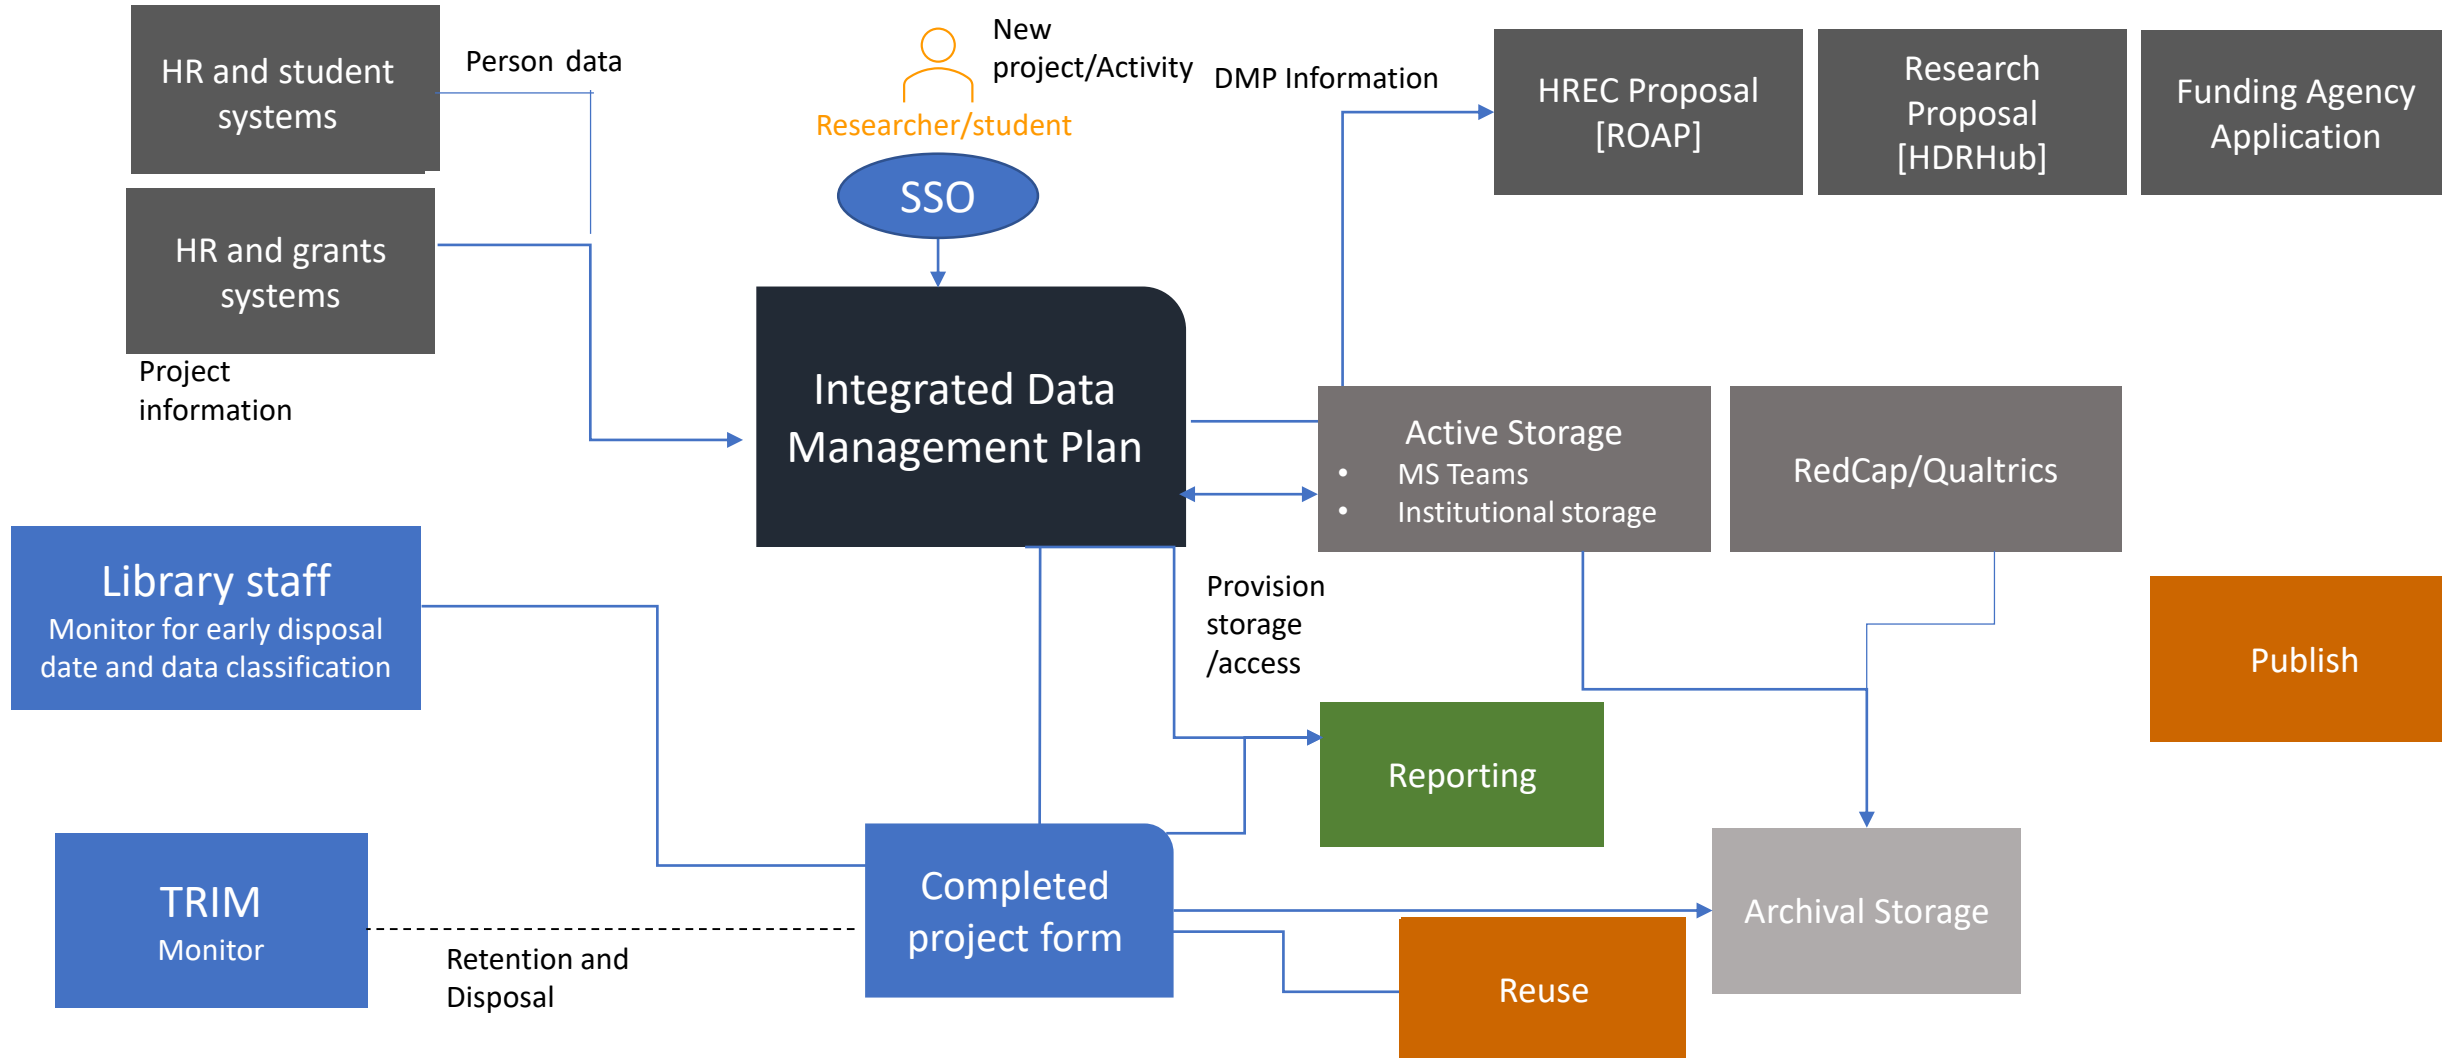

1. Integrated RDMP tool
2. Data Catalogue
3. New storage solution
4. Migration of data

# 1. Integrated RDMP tool

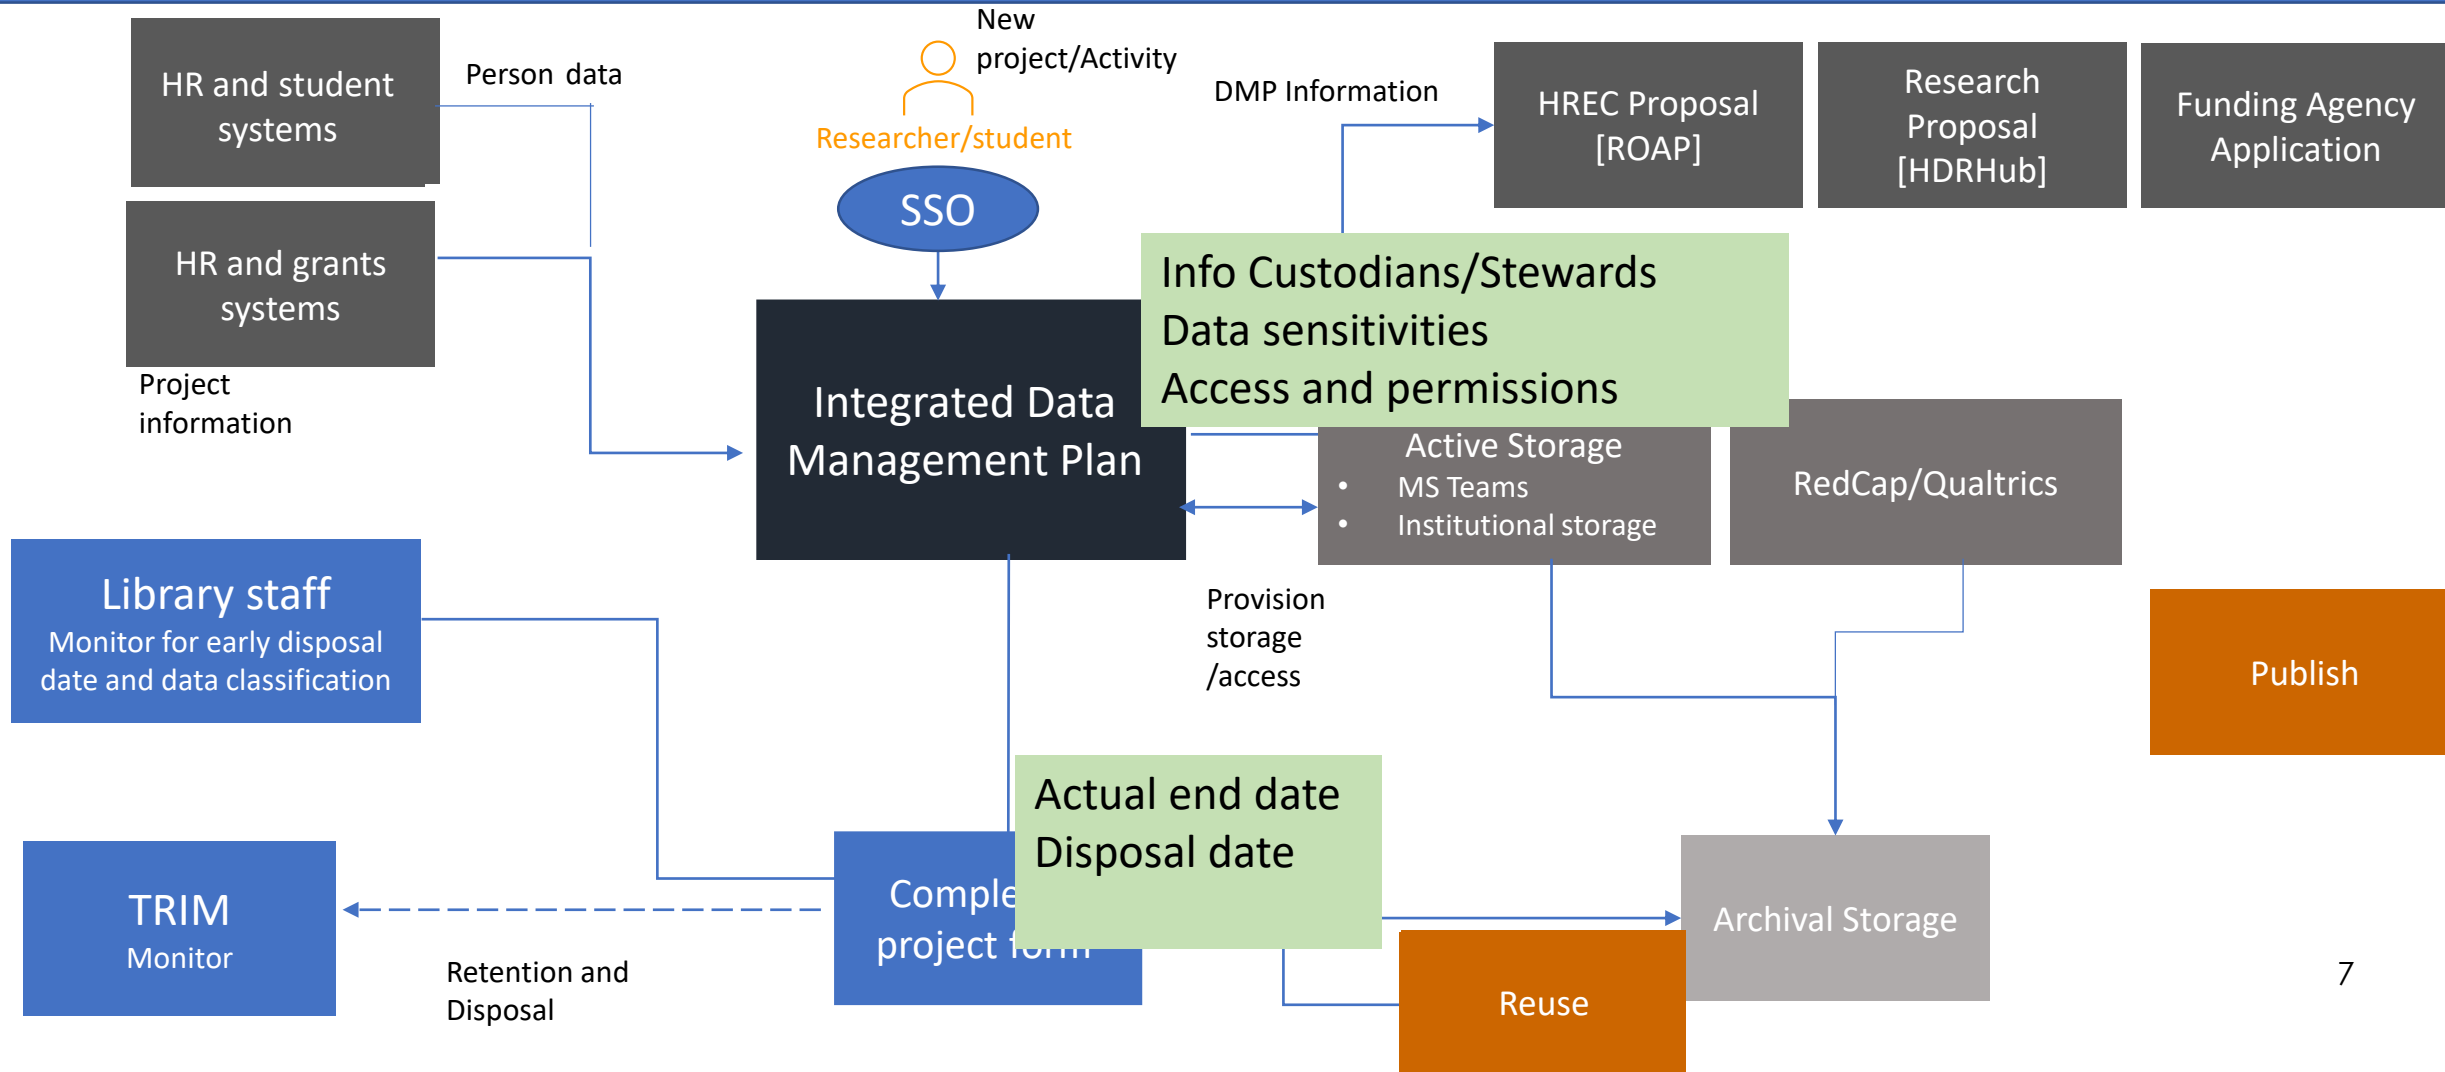

The goal: implement an integrated and essential piece of research infrastructure to enable the seamless and effective management of all aspects of research data at UWA.

- ReDBox (QCIF) selected as the platform to deliver the RDMP Tool
- A joint project between Uni IT, Library, Office of Research plus various stakeholders

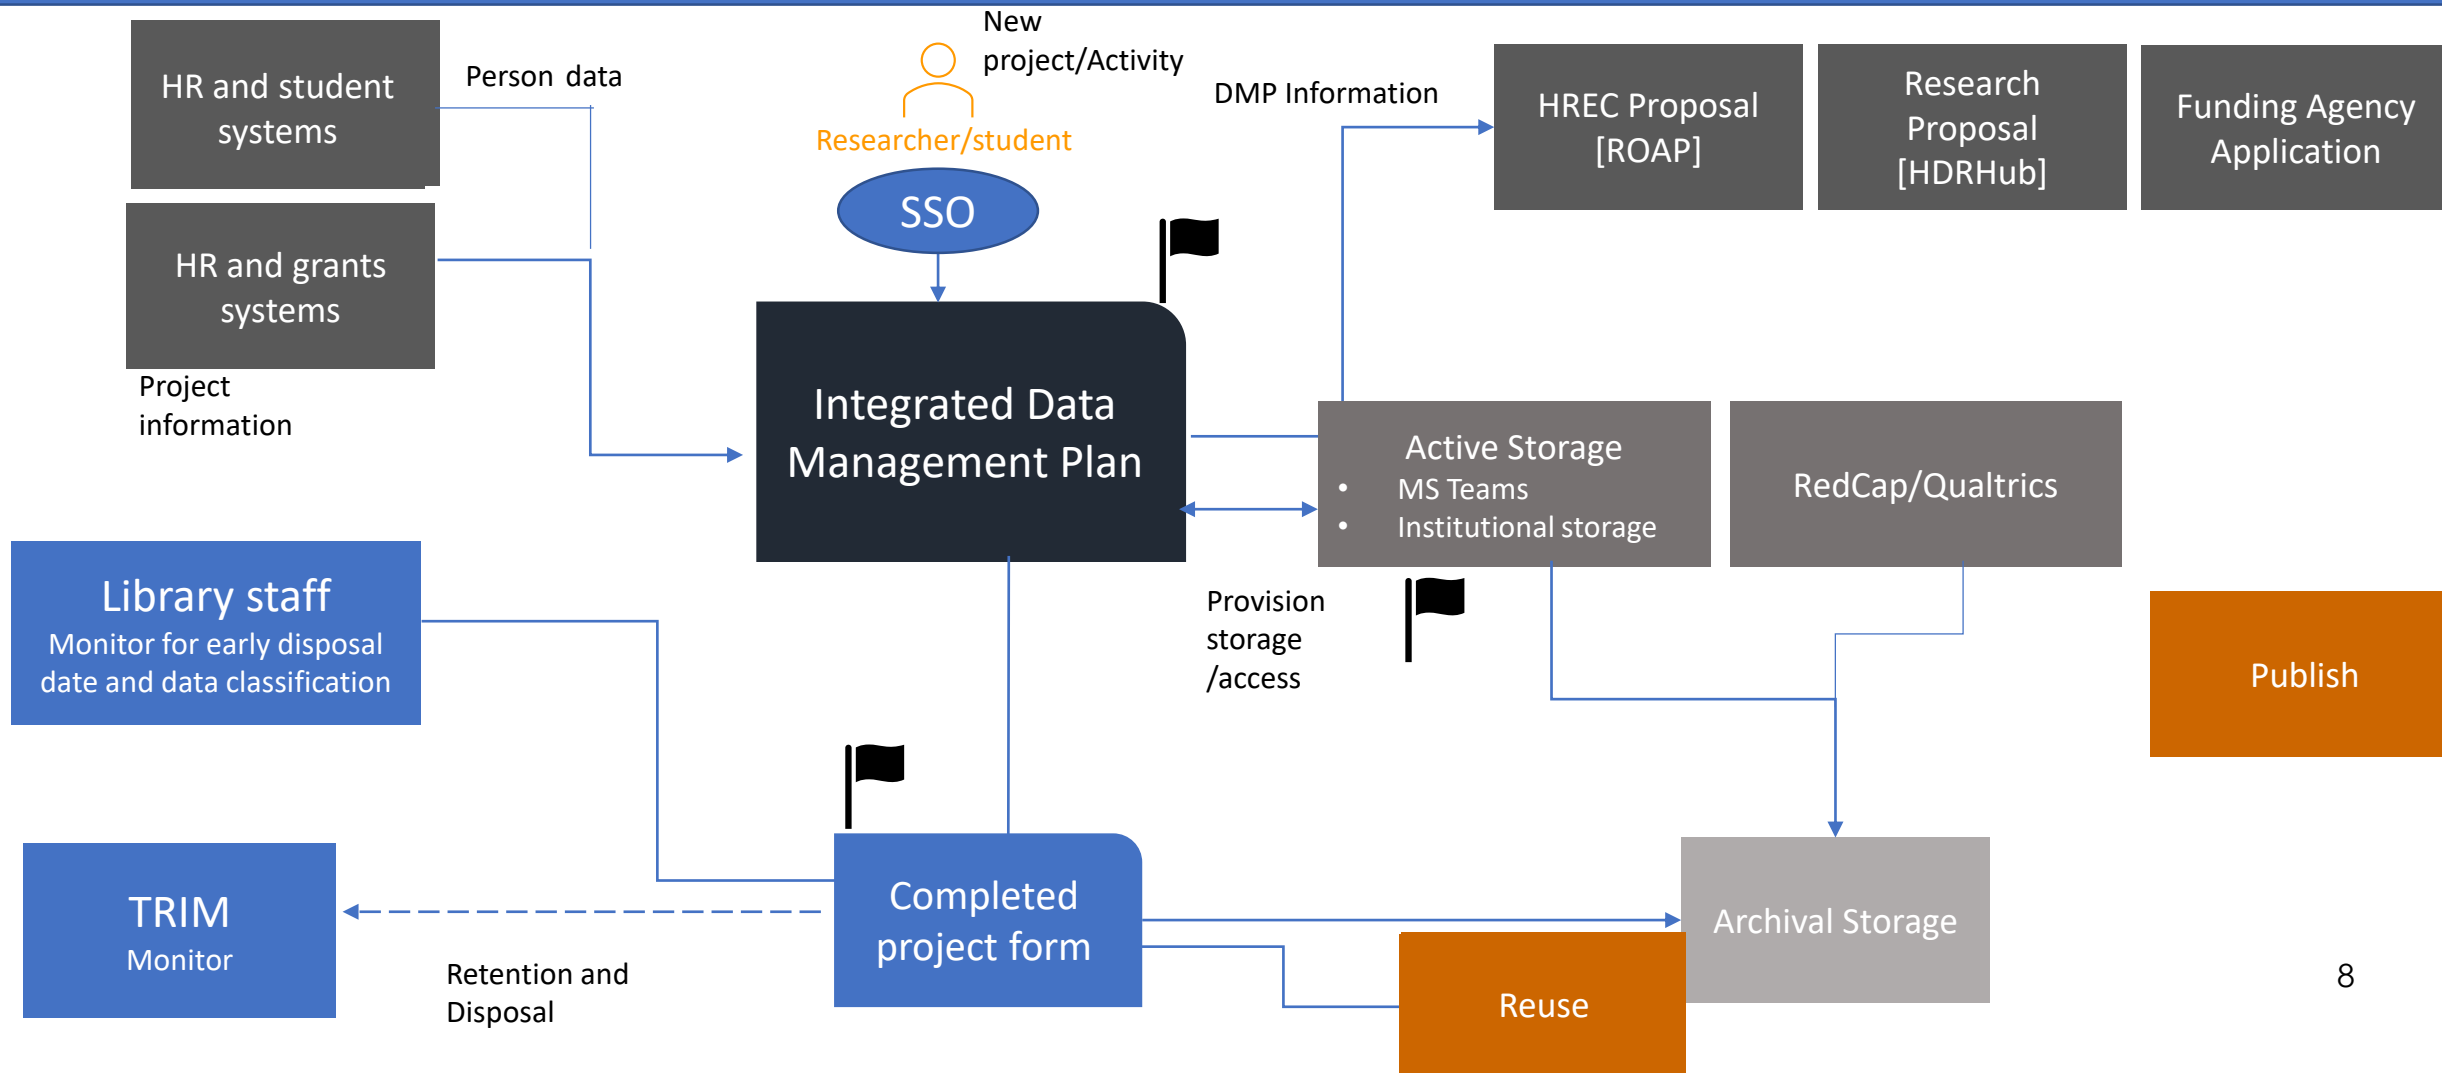

# ReDBox RDM Workflow

# ReDBox RDM Workflow

# ReDbox RDM Workflow

# Vision/Benefits

- ✓ Robust data governance
- ✓ Project based management of data
- ✓ Integration of relevant research support systems
- ✓ Data is classified
- ✓ Automated provisioning of storage
- ✓ Have greater visibility of storage (capacity used and what it is being stored)
- ✓ Retention and Disposal built into the workflow

# Current status

- Building in the integrations and customisations
  - Feedback from stakeholders
  - Testing with researchers
  - Reporting dashboard
- 
- Future – RAiDs and more integrations

Thank you
