# The future of eResearch in Aotearoa

---

eResearch Australasia

REANZ

# Acknowledgement of Country

I acknowledge the Turrbal and Jagera peoples, the Traditional Custodians of the land on which we meet today. I pay my respects to Elders past, present, and emerging.

# The world is changing around us

Artificial  
Intelligence

Digital  
Sovereignty

Resiliency

Increasing  
Cyber  
threats

Fiscal  
constraints

# Aotearoa's recent science sector history

eResearch identified as a critical enabler of research success and impact

Newly integrated organisation

# Strategy Development

## Sector-informed Approach

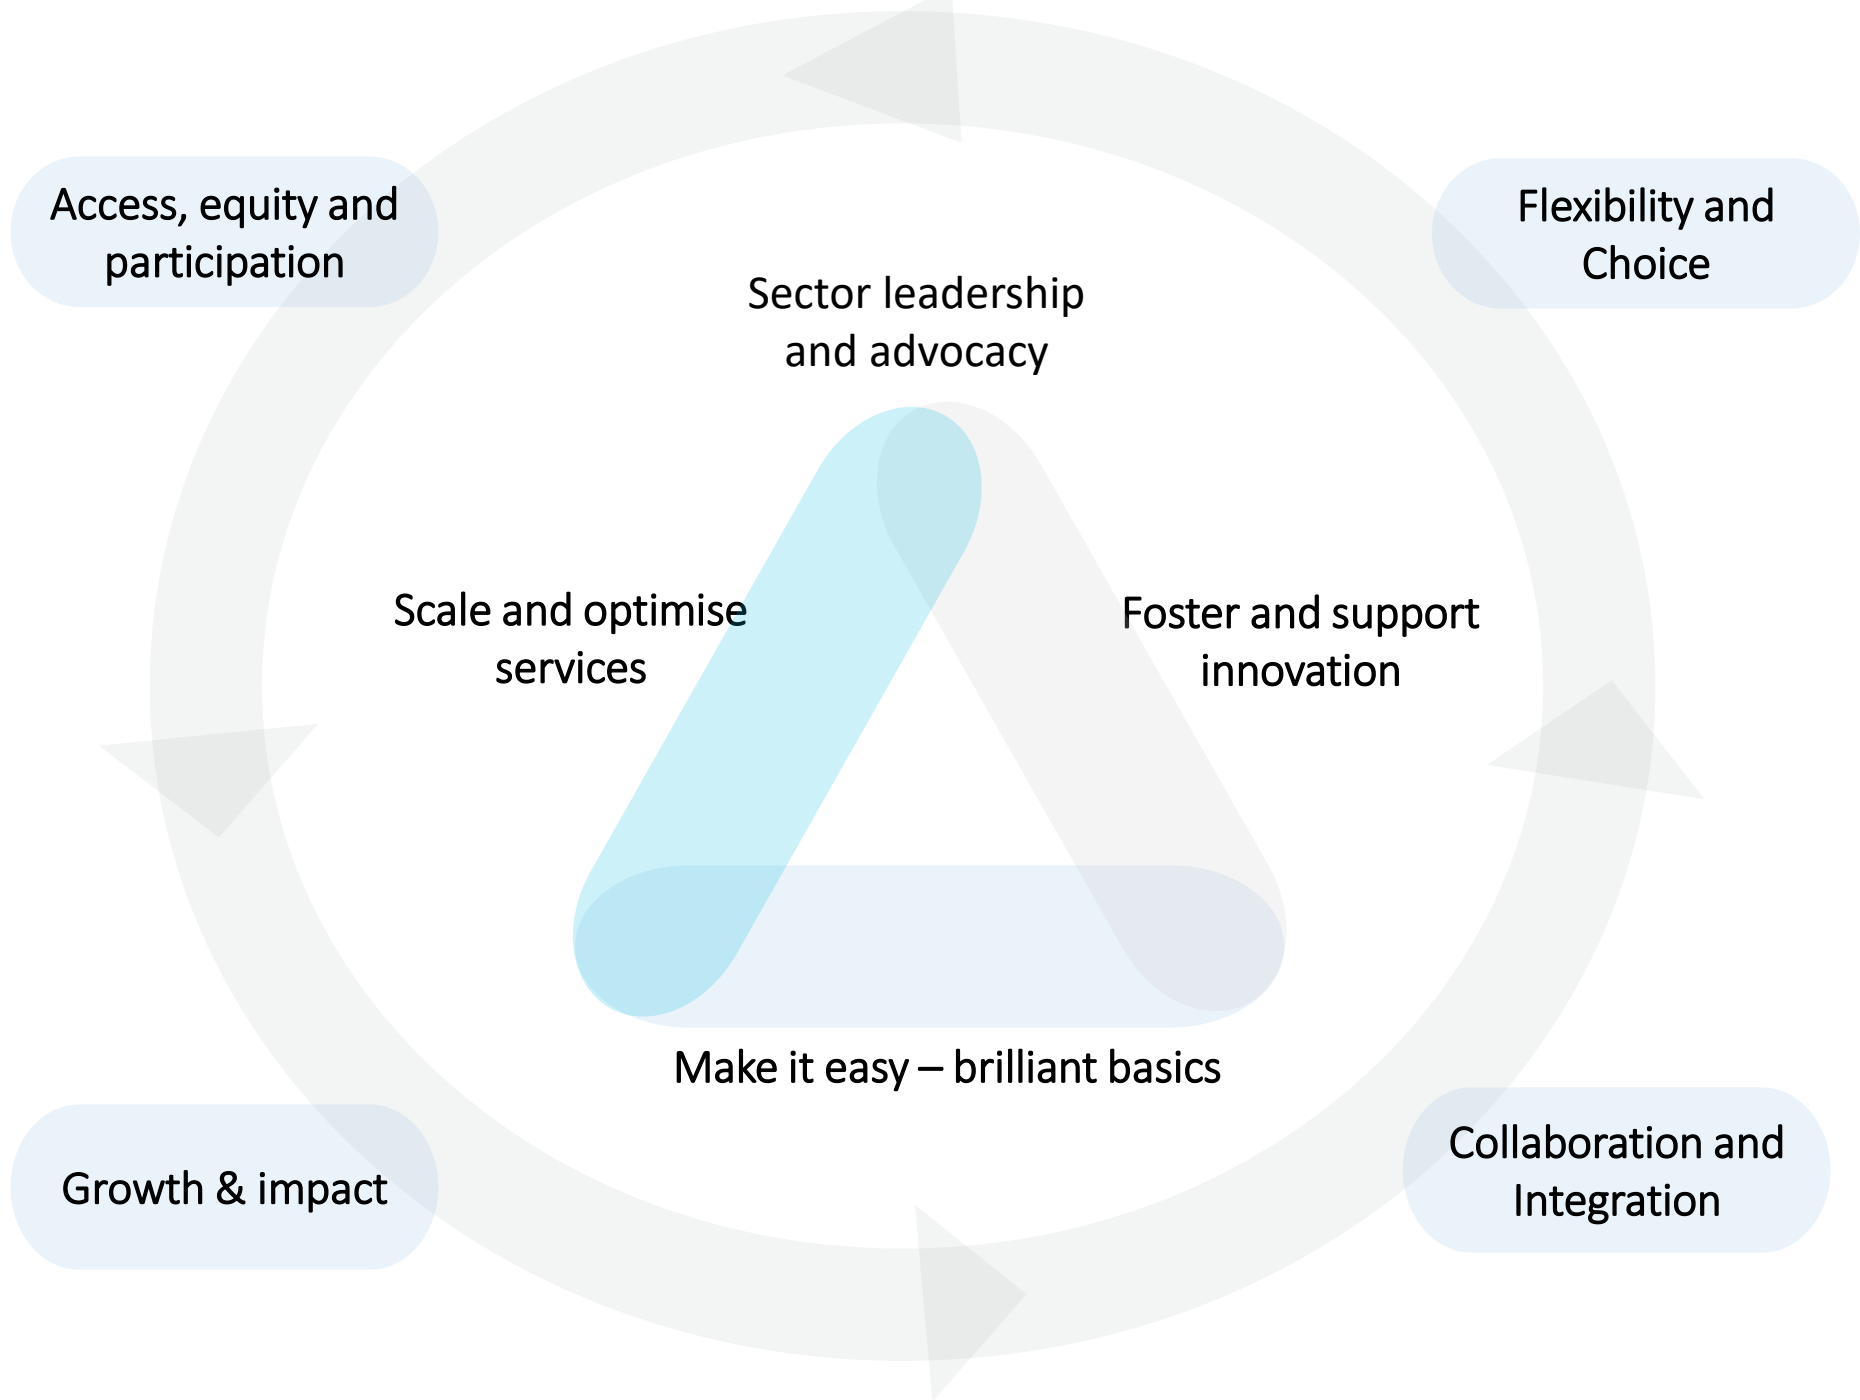

- > Oversight of the strategy development – Strategy Advisory Group
- > In-depth insights via interviews with a representative set of stakeholders
- > Open survey to ensure broad set of voices are heard

## Inputs

- > Letter of Expectation
- > Platform Plan
- > 2023 DDRI Report

## Challenges

- > Scale and constrained \$\$\$
- > Equity and sustainability
- > Consistent and responsive

## Strategic enabler and connector for research, education and innovation

- Supporting the sector to stay ahead of the innovation curve and navigate changing technology
- Anticipating needs and working with the sector to plan and deliver new infrastructure.
- Broker as well as builder of new infrastructure
- Sector leadership - advising government on eResearch infrastructure and advocating for sector needs
- Strategic co-ordination - leveraging the collective strengths of the sector to build cohesion and achieve more for NZ Inc
